

Requirement Analysis

Proposed System

The proposed system automates the entire Employee ID Card Request process using ServiceNow.

Proposed Workflow

Key Features

- Online request submission
- Automated approval process
- Automatic task generation
- Notification system
- Request tracking
- Centralized data storage

Functional Requirements

Functional requirements describe what the system must do.

Employee Request Submission

The system shall allow employees to submit ID card requests.

Inputs

- Employee Name
- Employee ID
- Department
- Request Type
- Reason

Request Storage

The system shall store all requests in the Employee ID Request table.

Approval Workflow

The system shall automatically route requests to the manager for approval.

Approval Decision

The manager shall be able to:

- Approve request
- Reject request

Task Creation

Upon approval, the system shall create a task for the administration team.

Notification Generation

The system shall send notifications after approval.

Request Tracking

The system shall maintain records of all requests and approvals.
