

PROJECT DEVELOPMENT PHASE

Employee ID Card Request Management System

Development Environment

Platform Used ServiceNow Developer Instance

Development Modules

- ServiceNow Studio
- Service Catalog
- Flow Designer
- Custom Tables
- Notifications
- Form Designer

Application Development

Step 1: Creation of Application

A custom application named:

Smart Employee ID Management

was created using ServiceNow Studio.

Purpose

The application serves as a centralized platform for managing employee ID card requests.

Application Components

- Custom Table
- Catalog Item
- Approval Flow
- Notification Module
- Access Controls

4. Custom Table Development

A custom table was created to store employee ID request information.

Table Name

Employee ID Request

Fields Created

Field Name Description

Employee Name Employee requesting ID card

Employee ID Employee identification number

Department Employee department

Field Name	Description
Request Type	New, Lost, Damaged, Replacement
Reason	Purpose of request
Approval Status	Approval state

Purpose

The table stores all request records and acts as the primary data repository for the application.

5. Form Design Development

A user-friendly form was designed for employee request submission.

Form Fields

Employee Information

- Employee Name
- Employee ID
- Department

Request Information

- Request Type

- Reason

Validation

Mandatory fields were configured to ensure complete request submission.

Benefits

- Improved usability
- Reduced data entry errors
- Standardized request collection

6. Catalog Item Development

A Service Catalog Item was created to allow employees to submit requests through the Service Portal.

Catalog Item Name

Employee ID Card Request

Required information

Employee Name Reason Urgency Employee ID Request Type

Variable	Type
Employee Name	Single Line Text
Employee ID	Single Line Text
Department	Choice
Request Type	Choice
Reason	Multi-Line Text
Urgency	Choice
Temporary ID Requested	Yes/No

Functionality

Employees can submit requests using a structured catalog form.

7. Workflow Development Using Flow Designer

A workflow was created using Flow Designer to automate the request lifecycle.

Flow Name

Employee ID Approval Flow

Trigger

Employee ID Request Created

The workflow starts automatically whenever a new request record is created.

Approval Action

An approval step was configured using:

Ask For Approval

Purpose

The request is routed to the manager for review and approval.

Approval Rule

Anyone Approves

Conditional Logic

An IF condition was configured.

Condition

Approval State = Approved

Purpose

The workflow proceeds only when approval is granted.

Notification Integration

A notification action was configured.

Notification Name

Employee ID Approved

Purpose

Notify employees after request approval.

The screenshot shows the 'Notification [sysevent_email_action]' configuration page in ServiceNow. The left sidebar contains a navigation menu with categories like Data, Security, User Interface, and Other. The main content area is titled 'New record' and includes a description: 'Use Notifications to notify users about specific activities in ServiceNow, such as updates to incidents or change requests. Notifications allow administrators to specify: • When to send the notification • Who receives the notification • What content is in the notification'. Below this, there are fields for 'Name' (empty), 'Table' (set to '-- None --'), 'Mandatory' (checkbox), 'Category' (set to 'Uncategorized'), 'Application' (set to 'Smart Employee ID Management'), and 'Active' (checkbox, checked). There is also an 'Allow Digest' checkbox. At the bottom, there are tabs for 'When to send', 'Who will receive', and 'What it will contain'. The 'When to send' tab is active, showing a list of circumstances under which notifications can be sent: 'A record is Inserted or Updated into the Table specified above', 'The specified event is fired', and 'Via a Flow Action'.

Notification Content

The notification informs the employee that:

- The request has been approved.
- The administrative team has been assigned a task.
